10K network version - Limits personal information to 10,000. Users, assessments, referrals, technical support and equipment are unlimited.

AT Tracker Plus© Major Changes are:

- The year as a key to referrals, assessments, technical support and system settings has been removed. This means that your referrals, assessments and technical supports can easily be accessed no matter what year they were conducted.
- The backup of data each time the program is closed.
- Backup/Restore includes Notes field.
- Mailing labels for individuals and sites serviced.
- Added mass data in the equipment inventory.
- You can change the label settings in some of the fields.
- Network versions are now unlimited users, referrals, assessments, technical support and equipment.
- Expanded the site ID drop down so you can easily see the site name.

- Now allows 10 agencies in system settings instead of 5.
- Mass Data Entry now clears and you only have to enter the ID# and Serial # fields only after entering the first item.
- All reports are now maximized so that you see all of the report form.
- Set bigger limits for referrals, assessments, technical support and equipment.
- Ability to change Support types for assessments.
- Equipment ID shows in Search/View data.
- Equipment Check In Use report now shows the equipment contact person.
- Drop down box for Equipment In Use report by Personal ID now shows by ID# and name of person.
